

Jan. 3, 1928.

Mr. Clair M. Senior,
Judge Bldg., City.

Dear Sir;

RE: BOWL CREEK DIST.

I have your favor of Dec. 31 with reference to Bowl Creek distribution and will endeavor to have matters arranged as far as possible by the commencement of the irrigating season. With reference to installing a measuring device I would say that I shall, of course, plan for as cheap a structure as will be efficient. I still feel that it is to Mr. Paces' best interests to have such a device permanently installed. I also have to bear in mind the provision of the statute which requires every water user to have such a device independent of whether in the opinion of the water user it would serve a continuous useful purpose.

Yours very truly,

State Engineer.
